## Why Microsoft Hardware for Business? Your connection to a great PC experience

**Get the most out of your Windows® PC investment.** It's easier now than ever before, since Microsoft Hardware works seamlessly with your Windows and Microsoft Office software. Our full line of products – from webcams and headsets, to keyboards and mice – help you work smarter and get the most out of your software, while increasing employee productivity through top performance features and best-in-class comfort.

[www.microsoft.com/uk/hardware/business](http://www.microsoft.com/uk/hardware/business)

## Software + Hardware for Business

**History of innovation** – For more than 27 years, Microsoft Hardware has been a technology leader that continues to raise the bar with award-winning innovations. Extensive lab testing and development ensure continued advancement in your connection to a great PC experience. From ergonomic designs, to high definition video, to seamless integration with Microsoft software, your experience with Microsoft Hardware for Business will deliver value, productivity and comfort to your workplace.

**Quality you can count on** – Each and every Microsoft Hardware peripheral is rigorously tested to ensure a quality experience.

### Choose from a full line of “for Business” products.

From mice and keyboards to webcams and headsets, Microsoft Hardware delivers:

#### Value for Business

Makes deploying quality technology simple and easy.

- Save money by buying in volume.
- Easily purchase and deploy high quality products.
- Reduce waste with less packaging.
- Enjoy support included with each product.

#### Productivity

Improve employee productivity with webcams and headsets optimised for Microsoft Lync.

- Great audio and video and you only need one click to make a video call.
- Mice, keyboards, webcams and headsets – all designed to work seamlessly with Microsoft software.

#### Ergonomics and Workplace Health

Microsoft contributes to comfort and welfare at work by providing a range of mice and keyboards designed to encourage a natural and ergonomic posture.

- Help improve employee comfort and health with ergonomic designs.
- Product designs work efficiently and effortlessly, and feel as good as they look.

 Windows 7

OPTIMIZED FOR  
Microsoft® Lync™

 Microsoft® Office 2010

## Unified Communications

Your employees want communication tools that make their work easier and are available anywhere, anytime. Microsoft® Lync™ Server 2010 transforms every communication into an interaction that is more collaborative, engaging, and accessible from anywhere.

### Microsoft Lync

From controlling costs to managing compliance, Microsoft Lync 2010 delivers value that speaks to the needs of today's organisations. A single interface unites voice, instant messaging, audio, video, and Web-conferencing into a richer, more contextual offering and a single identity makes it easier and more efficient for users to find contacts, check their availability and connect with them. Lync 2010 and Lync Server 2010 work consistently with Microsoft Office, enriching the experience of familiar applications like Microsoft Outlook®, Microsoft Word, Microsoft SharePoint®, and more.

### Webcams Optimised for Microsoft Lync

Using a webcam optimised for Microsoft Lync delivers all the benefits you would expect from a webcam and more. Microsoft's new LifeCam range is part of a Unified Communications approach, meaning seamless integration and ease of use. With Microsoft Lync, for example, it's one click to make a call, and just click again to launch a video connection via your LifeCam. In every way, a LifeCam enhances your Microsoft Lync experience and increases your ROI.

### Why an external webcam?

External webcams can have higher quality video, better optics, a larger aperture (requiring less light), a flexible camera angle and direction, an increased field of view, and the ability to easily manage security versus a built-in computer camera.

By offering clear, high quality, face-to-face communication, a webcam can help to mitigate miscommunication, increase employee productivity, decrease travel expenses, and reduce your carbon footprint. Imagine conferencing across different time zones with multiple people without the high cost of traveling.

**According to a recent Forrester report, the average cost of a business trip is around \$7,000<sup>1</sup>.** Using a webcam for some of those face-to-face meetings can eliminate the need for some business trips altogether, saving your company money.

Little wonder then that the CIO of one of the global accounting firms said to us, "Even if we only use the webcam once, to replace a meeting just across town, it's paid for itself several times over".

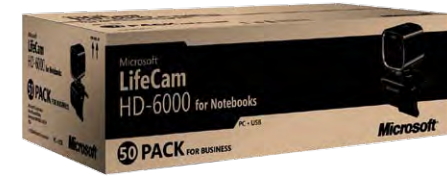

Note: Microsoft LifeCams for Business are optimised to work as true plug and play devices and do not ship with the consumer version of the software. Ask your Microsoft representative for an enterprise version of the consumer software if you wish to implement software features such as TrueColor™ and ClearFrame™ technology.

<sup>1</sup> Forrester Report: February 24, 2009 The ROI of Telepresence

## Purchasing Microsoft Hardware

### Volume pricing, reduced packaging

**Microsoft Hardware for Business** provides opportunity for greater savings by offering an easier way to purchase, sell and deploy Microsoft Hardware products. These products are for sale only to Microsoft distributors and resellers for business deployment, not for retail sales.

**Microsoft Hardware for Business** products are generally available in single units and 50-packs. The for Business line offers better pricing for businesses. The new packaging makes it easier to deploy and is environmentally friendly.

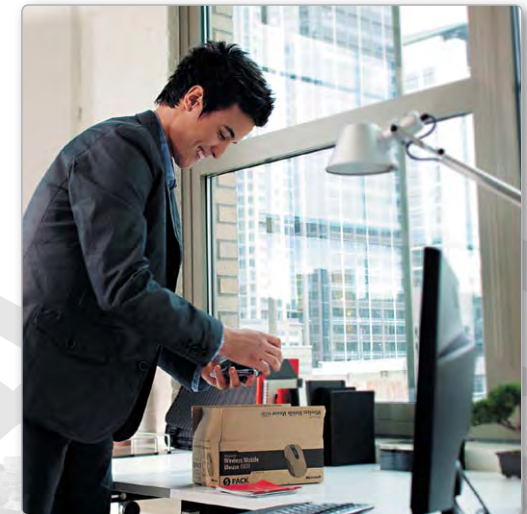

- **Savings**  
Volume Pricing
- **Easy to Order and Deploy**  
Everything the Customer Needs in One Easy to Open, Easy to Deploy Package
- **Support**  
Included with Each Product
- **Packaging**  
Reduced Waste, Environmentally Friendly

### Do your best by the planet.

Trading travel for video conferencing not only saves your company money, it also reduces your impact on the environment.

A recent American Consumer Institute study estimated that if video conferencing substituted just 10% of business air travel, it would reduce US carbon emissions by 35 million tons per annum. In every way, conferencing over the Web is far better for the planet.

# Communications - Webcams

## Why an external webcam?

**Higher Quality Video, Better Optics, Larger Aperture, Flexible Camera Angle and Direction, Increased Field of View and the ability to easily manage security.**

"We're already seeing significant travel cost savings and reduced logistics complexity with LifeCam Cinema and its HD capabilities, which also helps us meet our corporate sustainability and green IT goals." Rick Echevarria, Intel VP, GM, Business Client Platforms.

### Microsoft® LifeCam Studio™ for Business

**Never miss the detail of the meeting.**

Experience the amazing clarity and detail of HD video. With brilliant colour and crystal-clear audio, this webcam can increase employee productivity, decrease travel expenses, and reduce your carbon footprint by putting you in the centre of the meeting even if you are thousands of miles away.

- **Plug and Play**  
No software required.
- **1080p HD Widescreen Sensor<sup>1</sup>**  
For superior sharpness and image quality.
- **Advanced High Precision Optics<sup>2</sup>**  
Auto focus and high-precision glass element lens.
- **Clear, High Quality Video**
- **Includes Lens Cap and Protective Carrying Case**
- **High Fidelity Microphone**  
For more natural, detailed audio.
- **3-Year Limited Hardware Warranty<sup>3</sup>**

# Communications - Headsets

Microsoft® headsets provide great audio quality, convenient audio controls and all-day comfort. Designed to work seamlessly with Microsoft software, these headsets are optimised for Microsoft Lync™ and require no additional software.

## Microsoft® LifeChat® LX-6000 for Business

**Make every conversation more productive.**

This headset delivers whether you're on a crucial call or trying to meet a deadline in a distracting workplace. The stereo wideband digital audio provides clear, acoustically accurate sound. The noise cancelling microphone makes sure you are heard even in noisy surroundings.

- **Plug and Play Simplicity**  
No software. Just plug it in and you're in business.
- **Clear Stereo Sound**  
The wideband digital audio reproduces sound accurately.
- **Noise Cancelling Microphone**  
Meetings and conference calls will be more productive as voices clearly cut through even noisy surroundings.
- **Inline Volume and Microphone Controls**  
Adjust volume or mute on the fly with handy inline controls. And the call indicator light lets people know you're "busy."
- **All-Day Comfort**  
Ergonomically influenced earpieces and a 270-degree adjustable microphone provide all-day comfort.

Single Pack 7XF-00001 ERP £41.37\*  
50 Pack N5J-00001 ERP £1959.69\*

### Instantly Upgrade Your Communications

Built for Comfort

## Microsoft® LifeChat® LX-4000 for Business

**Stay tuned in and connected.**

This headset with a single earpiece lets you hear what's going on around you and still take care of business. The wideband digital audio provides clear, acoustically accurate sound. The highly sensitive, noise cancelling microphone gives you the confidence that you are being heard even when you're surrounded by a noisy workspace.

- **Plug and Play Simplicity**  
No software. Just plug it in and you're in business.
- **Selective Sound**  
The single earpiece provides the ability to handle calls and still hear everything around you.
- **Inline Volume and Microphone Controls**  
Adjust volume or mute on the fly with handy inline controls. And the call indicator light lets people know you're "busy."
- **All-Day Comfort**  
An ergonomically influenced earpiece and a 270-degree adjustable microphone provide all-day comfort.

Single Pack 7YF-00001 ERP £35.05\*  
50 Pack NGJ-00001 ERP £1660.29\*

An HD webcam can mean the difference between a good business communication experience and a great one.

With cinematic 16:9 widescreen, HD, crystal-clear images with auto focus and bright and colourful video, you won't find another high definition video experience like LifeCam Cinema™, LifeCam Studio™, LifeCam HD-6000 for Notebooks or LifeCam HD-3000.

Microsoft LifeCams come in different forms, video resolutions and price ranges to suit different business scenarios and budgets. Above is an overview of the current Microsoft LifeCams for Business available from Microsoft Hardware today.

# Ergonomics and Workplace Health

## Why do comfort and ergonomics matter to your business?

The costs associated with repetitive strain injury (RSI) to businesses are very high. Of the many risk factors associated with RSI, one of the easiest to address is improper workstation configuration. **370,000 people suffer from Repetitive Strain Injury in the UK alone – causing fatigue and discomfort and costing businesses billions annually<sup>1</sup>.** To combat this growing problem, Microsoft® has developed an ergonomic range of mice and keyboards to promote better positioning and posture in computer users working at their desks. Ultimately, implementing a solid ergonomic program not only provides computer users with a healthy and productive workplace, but is good for the bottom line as well.

## Improve employee comfort and health with ergonomic designs

- “Ergonomist Approved” designs reduce symptoms of repetitive stress injuries (RSI)<sup>1</sup> reducing costs by up to \$1,250 per employee per year.
- Notebook mouse users experience a lower incidence of pain compared with users who don’t use an external pointing device.
- Microsoft is the #1 best-selling brand of ergonomic keyboards.
- 94% of Comfort Curve users would recommend it to others<sup>2</sup>.
- Microsoft has on-staff ergonomists and usability experts, who continually search for new designs and technologies, striving to make the computing experience more comfortable, more intuitive and more productive.

## Design factors intended to maximise productivity by minimising operator fatigue and discomfort

## Notes

# Delivering innovation for over 28 years

## Innovation

Microsoft® Hardware has continually raised the bar, designing revolutionary peripherals that deliver ground breaking performance, comfort and design.

Since 1982, Microsoft has had a strong history of bringing innovation to peripherals and has introduced many industry firsts like the scroll wheel, optical tracking, the magnifier, BlueTrack Technology and ergonomic design to the market.

## Reliability

Our in-house reliability lab ensures nothing ships without passing a comprehensive battery of tests to simulate product storage, shipping and every-day usage conditions. During unique wear trials, mice are “run” between 85 and 215 miles to test performance, a distance comparable to travelling from London to Paris. Each keyboard product is required to pass millions of cycles of key pressing – more typing than any person does in a lifetime – while maintaining superior performance. The durability of mice and keyboards is also tested in multiple scenarios simulating contact with common chemicals including hand lotion and sweat. Our goal is to ensure the product stands up on day 1,000 as well as it did on day 1.

“Microsoft’s hardware team has a history of introducing small innovations that quietly change the way we use our PC.”
